

Cheryl “Monie” Olson is a fourth generation Colorado native. She graduated with a degree in secondary education, but worked in a pharmacy all while doing her under graduate work. After she received her undergraduate degree, she decided to attend the University of Colorado School of Pharmacy, and pursue her true passion. She worked in retail pharmacy at the beginning of her career, then moved on to Long Term Care for over a decade. She became a geriatric specialist, and from there she became one of the architects of one of the largest Hospice Pharmacies in Colorado. She is passionate about Hospice and Geriatrics, and, in Intellectual Disabilities (ID) she has found that same passion. The nurses and caregivers are similar in all three of those areas of expertise, and she believes she makes a difference when dealing with, and helping, the ID caregiver community.
